DETAILED ACTION

The Applicant has adequately addressed in Amendment B dated 9-2-03 issues regarding the Specification, Double Patenting, Claims Objections, and 112 Rejections asserted in the previous Office Action.

Claims 1-76 are cancelled.

The below action is non-final.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 77 and 84 are rejected under 35 U.S.C. 102(e) as being anticipated by Shigezawa et al. ('020).

Shigezawa discloses an air hose (8 which includes 76, figure 10), an inflatable thermal device (4, figure 1), an inlet port (78, figure 10) and a mechanism (68 which includes 70, figure 10). Note that figure 10 depicts the mechanism (68) partially in the air hose (8 which includes 76).

Further, the usage of the device includes inflating the device (4) with pressurized air (col. 4:48-50). Lastly, the "mechanism" (68 which includes 70) acts to control the flow of pressurized air as disclosed when describing an analogous mechanism (12 which includes 44) in col. 5:33-43.

Response to Arguments

Applicant's arguments with respect to claims 77-94 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 78-83 and 85-94 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
